

# EXPORT SETTINGS IN FCPX FOR BROADCAST PIX

Make sure your video has the proper export settings for the Broadcast Pix switcher.

## ONE - START A NEW PROJECT

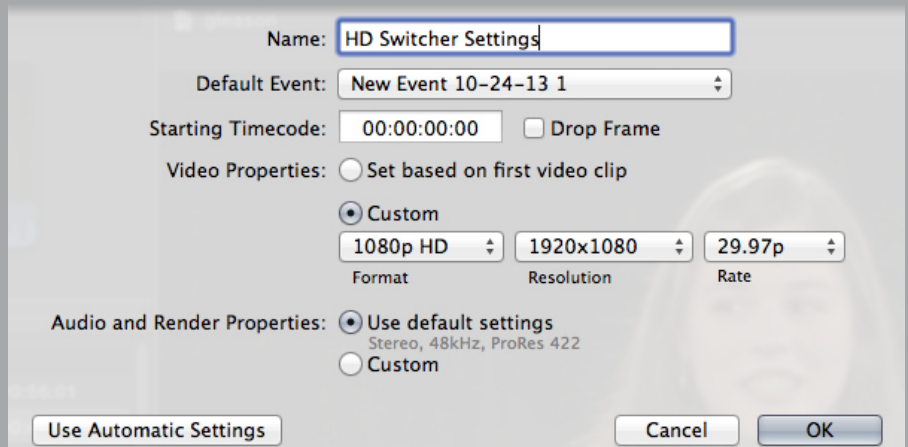

Click File > New Project

## TWO - CHANGE THE SETTINGS

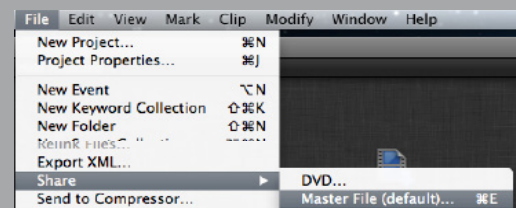

Click 'Use Custom Settings.'

Click 'Custom' under 'Video Properties. Change format to **1080p HD**, resolution to **1920 x 1080**, rate **29.97p**. Click 'OK' and start your FCPX project.

## THREE - EXPORT

When you're ready to export, File>Share>Master File or Command+E

## FOUR - SET FORMAT

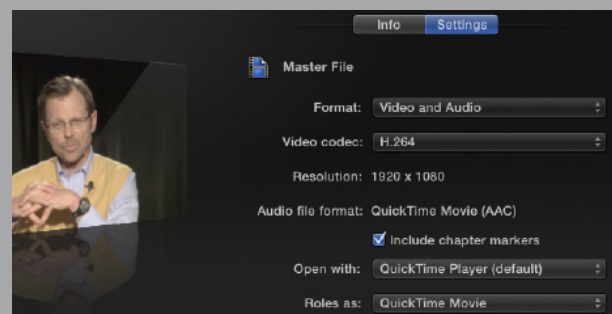

Format: Video and Audio

Video Codec: H.264

Open With: Quick Time Player

Roles as: Quick Time Movie

Click 'Next' and determine the saving location for your video.
