

CREATING OVER-THE-SHOULDER GRAPHICS

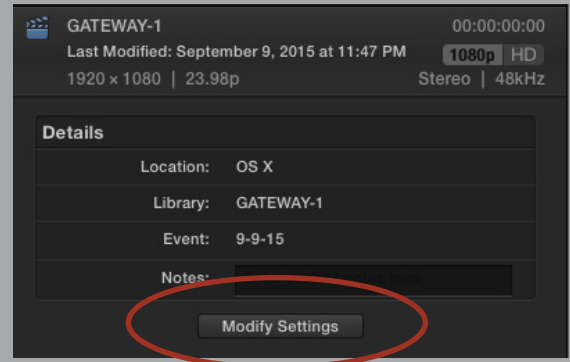

ONE

Launch Final Cut Pro X.

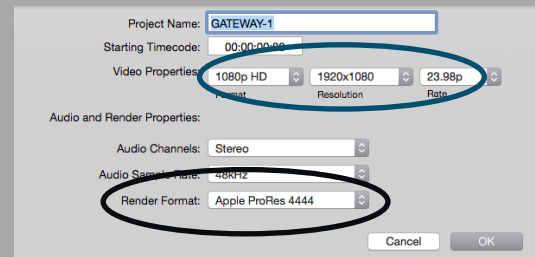

TWO

After you designate a library and create a new event, click the event and **open modify settings**. It is located in the top right box.

THREE

Set the video format to 1080p HD, the resolution to 1920 x 1080 and the frame rate to 29.97. Set the render format to Apple ProRes 4444.

FOUR

Open the **Titles** section in the lower right hand corner. Then **click the Over the Shoulder** category.

Drag the OTS from the menu on the right side of the screen and drop it on the timeline where you want it to appear in your video.

FIVE

Place your scrubber on the timeline somewhere inside where you placed the OTS.

Make sure that Title is selected at the top of the text editing window. Edit each line in the Inspector window.

and Communication

SIX

Select the **Title** category.

The **OTS Position** allows you to move the OTS from the left side of the screen to the right.

The **Sub Title** box indicates whether you want to use the second text line of the OTS or not.

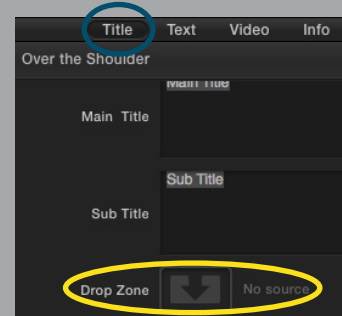

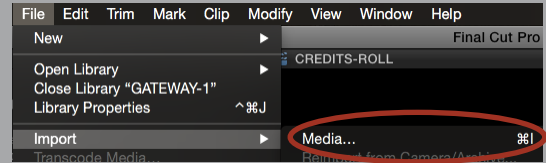

SEVEN

Import the graphic.

Select the **Title Category**.

Click on the **Drop Zone** in the editing window and select the graphic from the media library.

EIGHT

Double click the **OTS** in the editing window. This will allow you to change the size and move the graphic.

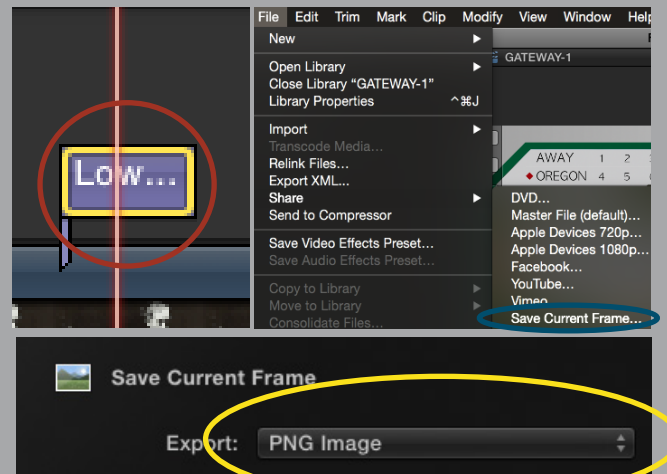

NINE

Place your **scrubber** on the timeline somewhere inside where you placed the lower third and in between the build in and build out boxes if you used them.

Click **File > Share > Save Current Frame**

When it asks you what file type to save your frame as, select **PNG Image**.
